

Wi-Fi Solar camera

K06

The all-in-one solar camera is easy to install and never needs dismantling or recharging, providing 24/7 monitoring.

When motion is detected, an instant alert is sent to your phone, and recording starts automatically on the built-in 32GB SD Card.

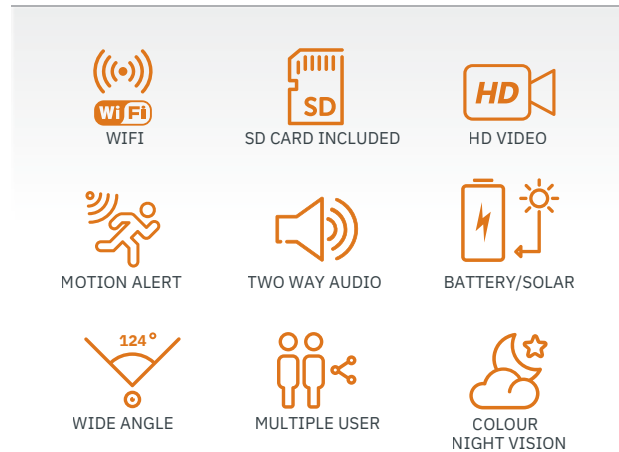

The camera's white light switches night vision from black and white to full colour, making identification easier.

Check in anytime to monitor your property and vehicles, giving you complete peace of mind.
