## Portable Full Height Turnstile Gate (Double)

The **Portable Full Height Turnstile Gate** is a flexible and secure access control solution designed for both indoor and outdoor pedestrian entrances.

Constructed from robust SUS304 stainless steel with a full-height rotating mechanism, this turnstile offers smooth, low-noise operation and long-lasting performance.

It includes safety features such as automatic fire-exit operation (opens on power-off), anti-tailgating, anti-reverse pass detection, infrared anti-clip protection, and configurable card memory settings.

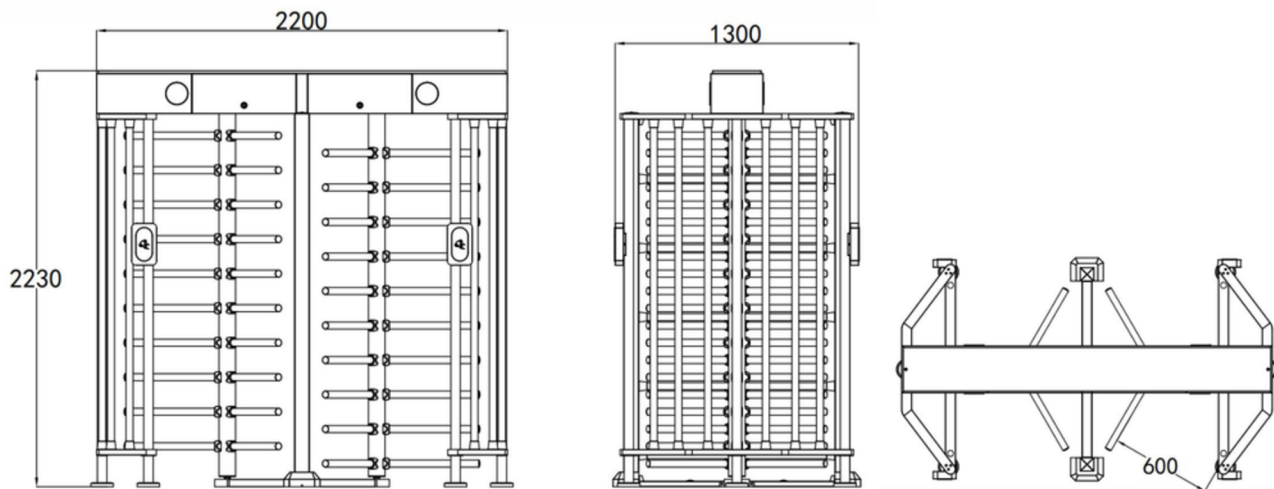

With automatic reset and multiple working modes, this portable turnstile is ideal for events, construction sites, temporary checkpoints, or any location requiring reliable yet movable security control.

### KEY BENEFITS:

- Durable SUS304 stainless steel construction for strength and corrosion resistance.
- Smooth, low-noise operation designed for long service life and reliable performance.
- Portable design allows easy relocation without permanent installation.
- Automatic fire-exit function opens the gate during power-off emergencies.

Dimensions:

All dimensions in mm

Specification:

Power	50W
Material	Body $\delta=1.2\text{mm}$ / fence $\phi=1.0\text{mm}$ SUS304
Indicator Light	Dynamic Indicator Light
Power Supply	24v 150W
Pass Width	600mm
Movement	Molding full-height turnstile movement
Drive Unit	Anti burn solenoid
Control Unit	Main Board
IP Rating	IP4X
Communication Interface	Dry Contact & RS485
Environment	Indoor and Outdoor
