Additional Information:

Abloy provides a lock kit which enables Abloy DIN mortice locks to be incorporated in fire resistant door leaves, as well as kits to suit the EA280 and EA281 lead covers.

These jackets provide fire resistance of 30minutes or 60minutes when fitted to full size door assemblies and tested in accordance with SEN1363-1:201 2.

Abloy have an intumescent jacket to suit the EffEff 351 series of locks and can supply intumescent jackets to suit other Abloy products on request.
